

The product

SIS Easy is the most advanced **maneuvering assistant** you can find on the market. It warns the driver with visual signals and buzzer.

Exclusively designed and developed to suit demand: our professional maneuvering assistant simplifies the daily work of forklift truck drivers operating either indoor or outdoor, especially at depots.

How does it work

Our patented ultrasonic sensor (**CySens**) detects the distance of approaching obstacles (objects, persons or structure), **MiniMind** display dynamically warns the driver with visual and acoustic alerts. Buzzer sound frequency becomes more intense on approaching the obstacle.
